Fastfold™ deluxe large portable screens

The ultimate large scale portable screen

The Fastfold frame work is simple to erect thanks to the quick release catches and sturdy aluminium sections. Frame sections simply fold out, locks into shape and mount on the T bar feet. Optional A braces are available for even greater screen rigidity. The screen frame has heavy duty popper studs to accept both the front or rear projection cloths. All screens up to 4880mm high are seamless, and have black backed screen material for higher quality. Supplied as a full screen kit including frame, legs and screen cloth all in a heavy duty wheeled case for storage and mobility. Drape kits are available and give a more permanently installed look to the screen - Price on application. Other sizes are available to special order.
